COMMERCIAL GAS FIRED

Make-Up Air Units

HVAC Products and Services for the Commercial Sector

Gas fired make-up air units and air handling units are used throughout the warehouse, transportation garage, restaurant, and manufacturing industries.

The rigorous demands of these applications form the backbone of the Commercial Gas Fired Make-Up Air Series of products. Contractors, engineers and building owners are challenged daily with HVAC construction, design and performance – both in new and retrofit applications. Designers must meet stringent requirements regarding energy efficiency, indoor air quality (IAQ) standards, and life cycle cost. To meet these challenges, SolutionAir has developed the PMI-IF, AW-I, and AW-D series of gas fired make-up air units.

Visit solutionairgroup.com or call 1.204.633.4808

90% EFFICIENT FURNACE

For Indirect Fired Rooftop Units

Reduce operating costs with high efficiency Indirect Fired Make-Up Air Units

PMI-IF series

The PMI-IF series is an indirect fired unit that utilizes a standard (80% efficient) or an optional high efficiency (90% efficient) stainless steel convoluted tube heat exchanger. By separating combustion air from the supply air, the unit is able to maintain excellent indoor air quality (IAQ). These units can be used in schools, offices, and institutional projects – anywhere that IAQ is paramount. The convoluted tube furnace is one of the most cost effective indirect fired designs.

AW-I series

For demanding indirect fired applications, SolutionAir offers the AW-I series with a three pass stainless steel drum and tube heat exchanger. The robust heat exchanger was designed to be incredibly reliable.

AW-D Series

For applications requiring a large volume of 100% outdoor air, the AW-D series offers a direct-fired alternative. The unit incorporates a high efficiency burner, which is capable of a high turndown ratio, maximizing discharge air temperature control with minimal combustion by-products.
